2. Activate your license on the webserver	2

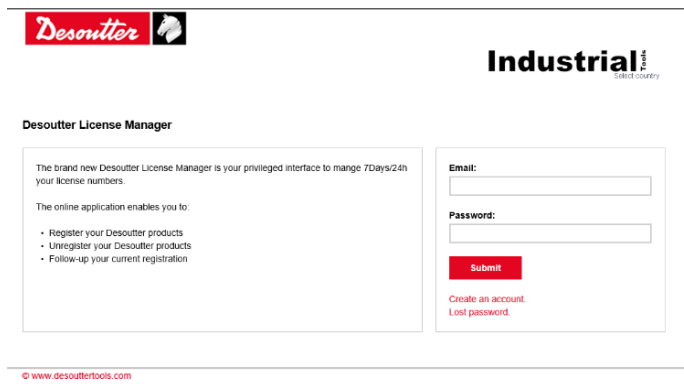

Add a new license on your user account

1. IMPORTANT

The [SOFTWARE] – 1 user license will authorize only one user.
 In case you buy a package of [SOFTWARE] – 25 users license, you will activate the license once only on the server but you have to install and register the software for 25 users accounts.

2. Activate your license on the webserver

Go to <https://licences.desouttertools.com>
 Open your user account on the license server
 Enter your mail and your password.

Open your “License Management” screen,

License Management

Enter the serial number and the license number.

You will find them on the label of the packaging box or on the license certificate.

Submit
